**EXPERIENCE SIOUX FALLS | (605) 367-7430 | [ExperienceSiouxFalls.com/FallsPark](https://www.ExperienceSiouxFalls.com/FallsPark)**

**THE FALLS OF THE BIG SIOUX RIVER** have been a focus of life in the region throughout history. Native Americans were the first to visit them and share stories of the Falls with European explorers. Since then, Falls Park has been the center of recreation and industry from the founding of the city in 1856. Located at 900 N. Phillips Ave., visitors can see the city's namesake falls, as well as some of the first buildings built in Sioux Falls. Today Falls Park covers 123 acres, and an average of 7,400 gallons of water drop 100 feet over the course of the Falls each second.

# WHAT is that RED ROCK you're seeing all over our city?

Known as **PINK** or **SIoux QUARTZITE** throughout the region, it's the bedrock under all of Sioux Falls, and its distinctive color is dramatically exposed in several areas, including Falls Park.

Its strength and durability (one of the hardest stones in the world) made it a desirable building material, and it was used to build many significant and historical buildings, as well as many homes and paved streets in Sioux Falls and the surrounding region. Excellent examples include the Federal Building (originally the post office), the Old Courthouse Museum, the Washington Pavilion, the South Dakota State Penitentiary, Calvary Episcopal Cathedral, and many others in Sioux Falls.

Many of the earliest quarries boomed during the 1880s and early 1890s but suffered greatly during the economic panic of 1893. Several closed, and others began to fade into history. The Works Progress Administration reopened some of the quarries in the 1930s during the Great Depression, but this revival was short-lived.

The high cost of cutting the stone and the development of less expensive construction methods led to the decline of Sioux Quartzite as a building and paving material. The stone is still quarried in several local quarries, but today it is used mainly as crushed stone in concrete and road pavement.

## WHAT'S NEW?

## A Clear View

The Visitor Information Center gift shop has the largest selection of Sioux Falls memorabilia! This is a great place to get information about Sioux Falls or get a scenic view of the skyline via the viewing tower's outdoor observation deck.

## Sioux Falls THROUGH THE PROHIBITION YEARS...

Before South Dakota enacted a state-wide prohibition in 1916 (four years before national prohibition), Sioux Falls had its share of saloons, and there were dozens of breweries. Previous to this date, however, constantly changing legislation kept citizens, saloon keepers, bootleggers and other ne'er-do-wells on tenterhooks, wondering what might come next regarding the manufacture, sale and distribution of alcohol.

Unsurprisingly, during prohibition many home grown stills like the Sioux Falls moonshine outfit buried under Lon Vaught's chicken house kept local and federal law enforcement busy. Prohibition was repealed in 1933 with the 21st Amendment, but South Dakota never officially repealed prohibition with a vote.

# THE CITY OF East Sioux Falls

From 1887 to 1913, land approximately two miles east of present-day Sioux Falls was the thriving community of **EAST SIOUX FALLS**.

The city boasted a hotel, several boarding houses, saloons and retail stores, a town hall, a cricket team, and a population of almost 600. It was a company town set up to quarry the great deposits of Sioux Quartzite, and the industry attracted Welsh, English, and Scottish stonecutters and their families. The work of the stonecutters was highly skilled but dangerous, for they risked contracting a lung ailment from breathing the fine "Jasper dust," a residue of the cutting process. The city prospered, as large quantities of stone were shipped by the Illinois Central Railroad to Detroit, St. Louis, Chicago, and other distant cities.

The financial "Panic of 1893" and growing competition from other materials led to decreased demand for the more elegant, and more costly, quartzite. By 1910, the quarries were producing only a small amount of crushed rock, and in 1913, the town government self-dissolved.

MAKING THE PAST

*Part of the future.*

It is home to manuscript collections and a library which are available for public research.
